DETAILED ACTION

Claim Objections

Claim 1 is objected to because it appears that "orifices" in line 17 should be changed to --orifice--, in view of line 4 of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rendered indefinite by the recitation "a narrower neck portion" in line 5 since the term "narrower" is a relative term. The term "narrower" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. *In particular*, it appears that this element should be compared to some other claimed element, i.e., the neck portion is "narrower" compared to which element?

Claim 1 is also rendered indefinite by the limitation "to form at least one spring arm" in line 22. *In particular*, the structural relationship between the elements is unclear, i.e., it is unclear whether the spring arm is formed "between" the an edge of the plate and the locking groove, whether the spring arm is formed "between" the slot and locking groove, etc.

Art Unit: 3634

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and thus claims 2-6 are objected to as being dependent upon a rejected base claim.
